Dear Recruiter Manager, I would love to work at Camunda. I am a former 11 years experienced Production Engineer that change career path to Web Development. JavaScript is my key technology and I love it. I believe that high performance indicates a good piece of engineering, it's one of my top goals. My one year of experience as a Full Stack Development student at DCI Berlin has honed my React, Redux, JavaScript, Node.js, MongoDB, CSS3 and HTML5 skills, as well as my knowledge of UX/UI mobile and responsive design. Some of my web development projects can be viewed at my portfolio <https://ajedelmann.github.io/portfolio/> I am a target oriented professional that bring experience from working in different roles and departments. I think my skills and experience makes me a great fit for Camunda. I know how important the details are for a Front End Developer. My keen attention to detail and dedication to solving any problem at hand are what separates me from other candidates with similar qualifications. If you agree that I'd be a good fit for your organization, I would love to schedule an interview at your earliest convenience.

Best Regards,
Alex
