

Albert Edelmann

Frontend Developer

Innovative optimized solution seeker. Excited to be at the deployment phase of my new career as a web developer. I am target oriented, adventurous, assiduous, animated and passionate by learning new technologies. JavaScript is my key technology and I love it. I believe that high performance indicates a good piece of engineering, it's one of my top goals. Software stack: ----- . JavaScript (ES6/ES5, React, Node.js, Express.js, jQuery), . Git, . CSS3/CSS (SASS), . HTML5/HTML (Bootstrap), . MongoDB, . SQL

PROJECTS

Hydro Alunorte

Project description Hydro Alunorte is the world's largest alumina refinery outside China and is located in the city of Barcarena, state of Pará. The alumina is the raw material for aluminum and is produced from bauxite, through the process called Bayer. HATCH scope for this project was Engineering (package interfaces) and support management services for procurement and construction. The project includes the installation of several press filters, new pipe conveyor, five electrical substations, a storage area for red mud residue, and water effluent treatment system. My main role on this project was to manage the contracts regarding Expediting and VQS teams.

WORK EXPERIENCE

Procurement Team Lead

Consórcio UFN3

May / 2012 - Jan / 2014

São Paulo e Região, Brasil

Achievements / Tasks

- Coordinated the expediting and inspection team, in order to ensure that all the hundreds of suppliers linked to this Project complied with the contract terms as well as with the numerous Petrobras Quality requirements.
- Coordinated and performed Kick of Meetings at national and international vendors in order to align them with project directives and avoid losing control of schedule for each supply step;
- Performed PIM and Expediting meetings at national and international vendors (located in Brazil, Europe, North America and Asia), in order to make sure that all project quality requirements were being attended and to issue reports confirming actual supply status on each visit. see less

Procurement Contract Specialist

Camargo Corrêa

Jan / 2007 - Apr / 2012

São Paulo e Região, Brasil

Achievements / Tasks

- During 5 years of work on this Brazilian multinational company, I was involved in 3 major projects: 2010 to 2012 – International Expediter Lead and Contract Management Project: RNEST (Energy Transmission line Construction) Client: PETROBRAS Highlight: RNEST Project became the most modern refinery that Petrobras ever built, RNEST will also be the 5th largest unit in refining capacity (230,000 barrels per day - bpd). I worked for 3 years in this project as the International Expediter Lead, performing monthly expediting visits at supplier shops all around the world in order to ensure the contract terms. Oil & Gas 2009 to 2010 – Procurement Coordinator Project: UÍGE (Energy Transmission line Construction) Client: ANGOLA GOVERNMENT Infrastructure 2007 to 2009 – Procurement Analyst Project: ALUMAR (Alluminium Refinery Expansion) Client: ALCOA Light Metals see less

PROJECTS

UFN3 Petrobras Project

Project description UFN III Project consists in a Nitrogen Fertilizing Plant construction, in Três Lagoas City, MT, Brazil. This Project target was to improve production of Ammonia and Ureia to be used mainly for Agriculture purposes. My main role on this project was to coordinate the expediting and inspection team inside Procurement department.

RNEST Petrobras Project

Project description RNEST Project became the most modern refinery that Petrobras ever built, RNEST will also be the 5th largest unit in refining capacity (230,000 barrels per day - bpd). I collaborated in this project as the International Expediter Lead, performing monthly expediting visits at supplier shops all around the world in order to ensure the contract terms.

Uige - Maquela do Zombo

Project description This project was a construction of a energy transmission line of 200km between cities Uige and Maquela do Zombo in Angola. According to a agreement with BNDES all equipments and materials were exported by brazilian suppliers. My main role on this project was to expedite and inspect equipments and materials before shipping to Angola.

Alumar - ALREFU2 - Alumina Refinery Expansion II

Project description ALREFU2 is an plant expansion of existing Alumar refinery in São Luis do Maranhão. This USD 3,0 Billions CAPEX project was a complex design made in two different countries (Brazil and Australia) using different system tools such as PDS, SmartPlant Instrumentation , SmartPlant Materials and I-sketch.
