

Albert Edelmann

Frontend Developer

Former 11 years experienced Production Engineer that changed career path to Web Development. I believe that high performance indicates a good piece of engineering, it's one of my top goals. I am target oriented, proactive, adventurous, assiduous, animated and passionate by learning new technologies. This CV was build with CVFY, my graduation project.

PROJECTS

CVFY (12/2019 - 03/2020)

A full-stack website that provides professional CV and Cover Letter templates where the user can import their data from LinkedIn, build their CV and Cover Letter and style it with our may design features, save the document online, convert it to pdf and more.

Main technologies used: React, Context API, Node.js and MongoDB.

Roman Calculator (02/2020)

A frontend application that calculate roman numbers builded with React and tested with Jest.

Jammming (01/2020)

A website builded with React, fetching data from Spotify API to allow users to search the Spotify library, create a custom playlist, then save it to Spotify account.

React Todo App (12/2019 - 01/2020)

Full-stack application builded with: React and Redux (frontend), fetching data from my own API builded with Node.js and MongoDB (backend).Apr

React Ravenous (12/2019)

Builded with React, Node.js and fetching data from Yelp API.

WORK EXPERIENCE

Procurement Contract Specialist

Camargo Corrêa

01 / 2007 - 04 / 2012

Sao Paulo, Brazil

Achievements / Tasks

During 5 years of work on this Brazilian multinational company, I was involved in 3 major projects:

2010 to 2012 – International Expediter Lead

Project: RNEST (Oil&Gas Refinery Construction)

Client: PETROBRAS

2009 to 2010 – Procurement Coordinator

Project: UÍGE (Energy Transmission line Construction)

Client: ANGOLA GOVERNMENT

2007 to 2009 – Procurement Analyst

Project: ALUMAR (Alluminium Refinery Expansion)

Client: ALCOA

EDUCATION

Full Stack Web Development

DCI Digital Career Institute GmbH

03 / 2019 - 04 / 2020

Berlin, Germany

Production Engineering - Bachelor Degree

Unifass

01 / 2009 - 12 / 2014

Brazil

Marketing & Advertising

Universidade Presbiteriana Mackenzie

07 / 2000 - 12 / 2004

Brazil

PROJECTS

Music-chords-API (11/2019)

RESTful API of music chords using Node, Express, Puppeteer and Mongoose.

Piano Player (08/2019 - 10/2019)

Created with pure JavaScript. It can be played with computer keyboard. Have fun testing.

Rhyme Generator (06/2019 - 07/2019)

In this project I use the boilerplate code for an AJAX request using XHR object on Datamuse API to search for words that rhyme.

CERTIFICATIONS
